EFKANET2001 for Windows

Can not be used for Windows NT

Status: 04/09/01

Information on EFKANET2001.EXE

Installation of Efkanet2001

The **EFKANET2001.EXE** file is self-extracting.

- Start the **EFKANET2001.EXE** program.

- A **C:\ TempEfkanet** directory is created, and the set-up files are copied into this directory...

- Go to the **C:\ TempEfkanet** directory.

- Start the **SETUP.EXE** program in the **C:\ TempEfkanet** directory.

- The program is being set up and you are guided through the installation!

- The Progefka / Origefka and Custom directories are created or preserved in case you had already installed a previous Efkanet.

- When the installation is completed, you can erase the **C:\ TempEfkanet** directory!

- Start Efkanet2001 by way of the Windows start menu.
