Drives and Control Systems

AB611A / AB620A

- Useful for light (DC1200), heavy-duty (DC1250), extra heavy-duty (DC1280) and for direct drive applications (DC1210/DC1230)
- Digital programming directly on the control box
- Programmable maximum rotational speed, acceleration and braking curves
- Operating hours counter
- Machine operating time monitoring with optical indicator when service required

- Flash technology, no Eprom
- Connection for USB memory stick
- Universal mounting above or below the tableboard (under-table mounting set as special accessories)
- Operates with V belt or timing belt (different transmission ratios possible)
- Pedal actuation using EB401 analog actuator

AB611A

- Universally usable for sewing machines with foot lift and thread trim:
- Lockstitch - Pfaff, Dürkopp Adler, Brother, Juki, Singer, and other brands
- Lockstitch (medium to heavier duty) - Dürkopp Adler, Pfaff, Juki, Brother, and other brands
- Chainstitch - All brands
- Overlock - All brands
- Backlatch - Pegasus, Yamato
- Adapter cords for various sewing machine brands are available
- Programmable light barrier functions
- 6 (13 - AB620A) short-circuit proof signal outputs with overload protection
- 7 individually programmable switch inputs
- Separate knee switch connection

AB620A

Additional functions:

- Backtack, stitch condensing, chain suction, high lift for walking foot
- Connector for Variocontrol V810 / V820 + V800 / V860

Direktmontage

Untertischmontage

- Direct mounting kits available for Yamato, Juki, Pegasus, Kansai and Strobel

Weight of motor:
DC1200 - 2,160 kg
DC1250 - 2,760 kg

KL2584

Weight of control:
2,46 kg
